DOUBLE YOUR ROLLER WARRANTY TO TWO YEARS BY GOING ONLINE AND FILLING OUT THE RATA PRODUCT REGISTER FORM.

http://www.rataindustries.co.nz/register-product

Or, scan the QR code located on the draw bar

ACQUISITION AND WARRANTY

On delivery of the roller carefully check for transit damage and report any defects immediately. Please visit our website and complete the product register form. The commencement of warranty is based on the purchase date of your machine, provided the product register form is received at Rata Industries within 14 days of the purchase date. Warranty claims will only be processed upon receipt of proof of purchase and submission of the warranty registration form within 14 days of purchase.

Dear Customer

Rata Industries would like to take this opportunity to welcome you as the new owner of a Breaker Ring Roller. We want your roller to be the most efficient and reliable piece of equipment you have. This manual has been produced to assist in the correct operation, maintenance and care of your machine.

The safe operation and maintenance of your roller is very important to prevent any personal injury and/or damage. Read and fully understand the following instructions before using your machine or carrying out any maintenance.

Machine Identification

The machine serial number plate is on the top of the draw bar. Please record the machine serial number in the product registration form on the Rata website.

http://www.rataindustries.co.nz/register-product

Always quote the serial number when re-ordering parts.

WARRANTY

Rata Industries warrants new products sold by it, to be free from defects in material and workmanship for a period of 12 months after the date of purchase to the initial user. This warranty is for the replacement or repair of any part found to be defective during the warranty period. This warranty only applies to new Rata products.

If the product is purchased for commercial use or hire gain, then the warranty is reduced to three months.

Should the product fail as a result of a fault in material or sub-standard workmanship by the manufacturer within the warranty period then Rata Industries will agree to repair this product subject to the conditions of this warranty.

This warranty excludes any transport costs or damage and excludes all normal maintenance costs. Rata Industries will not pay for mileage, freight, courier costs, oil, grease or any other expendable materials.

As the use of the Rata product is outside our control, Rata Industries accepts no liability for lost earnings or down time directly or indirectly caused by the machines performance.

Replacement parts provided under the terms of this warranty are covered for the remainder of the warranty period applicable to the product in which they were installed as if such parts were original components of that product.

No warranty work is to be started without first getting approval and following the correct warranty procedures as set out by Rata Industries. Rata Industries will not under any circumstances pay for or repair any damage caused by misuse or neglect of any machine.

All warranty issues and claims are totally at the discretion of Rata Industries.
Warranty Exclusions: loose bolts and screws including worn holes for the same, belts, tyres, blades, PTO shafts, disc bearings and hydraulic hoses, these parts are generally not covered by this warranty.

DELIVERY

The machine is delivered fully assembled, however, before use carefully check the entire machine for transit damage and report any problems immediately.

Rata Industries thanks you for buying our product.
We are sure you will be impressed!

MAINTENANCE AND LUBRICATION

Take care to keep the floor area clean when performing maintenance to the machine. Help protect our environment and prevent injuries from falls by cleaning up any spilled or leaking fluids with absorbent products. Take care to dispose of contaminated rags or absorbents in accordance with your local environmental regulations. Put away tools and roll up any air lines or electrical cords that were used when making repairs to the equipment and dispose of scrap materials or worn out parts in an appropriate manner.

Never crawl under the machine to make repairs or adjustments unless you have properly blocked and supported the roller frame. The roller must be secured in a fixed position in order to prevent it from moving or falling before making any attempt to work underneath. Use suitable shop stands or lifting devices that can support the entire weight of the implement. Never use cement blocks, bricks, hollow tiles or other props that may crumble or collapse under continuous load.

Regularly check all nuts and bolts for tightness and secure if loose. Replace worn out or damaged machine components.

Establish a good routine for regular inspection, lubrication and maintenance in order to keep the machine in good operating condition.

SAFETY INSTRUCTIONS

WARNINGS AND CAUTIONS

1. Throughout this manual the word WARNING is used to alert the operator and others to the risk of personal injury during the operation of the equipment. CAUTION indicates the possibility of damage to the machine.

2. Carefully read and take note of the following warnings before attempting to tow or operate the roller.

Warning: Ensure the roller tow hitch is in good repair and suitable for attaching.

Warning: Check that all moving parts are in good repair and that all the fasteners are correctly tightened.

Warning: Never allow any person to ride on the roller

Warning: Do not exceed the maximum weight/capacity specified by the manufacturer of the towing vehicle.

Warning: Foreign objects can cause extensive damage to the machine and result in injury to the operator. Make sure there are no foreign objects in your path of travel.

Warning: Before using the roller the operator should ensure that this manual is read and fully understood.

Warning: Obey all road rules and regulations while driving with the roller on the road.

Warning: Ensure all bolts are kept tight, particularly on the roller axle and transport wheels.

Warning: If your machine has been supplied with a transport support chain, this MUST be used at all times to support the roller assembly whilst in transport position.

PRODUCT SAFETY PRECAUTIONS

Make certain all safety decals and reflectors signs are applied to your machine. Refer to your local governmental regulations for more information on proper procedures and markings for safe road transport in your area.

Reduce speed in adverse weather, when turning or travelling on inclines or uneven ground. Always start and stop slowly.

DANGER! Watch for wires.
Take care when transporting the implement around power lines. Serious injury or death to the operator or bystanders will result through direct or indirect contact with power lines.
The operator is responsible at all times to comply with the local government regulations and insure the safe transport of the implement when transporting large or oversized implements on public or private roadways. Careful consideration must be given in order to prevent accidents with other vehicles and avoid coming in contact with obstacles such as: bridges, tunnels, overpasses, guard rails, road signs, traffic lights, power lines, public utilities, and other structures that may be encountered along the chosen route. In some jurisdictions the operator may be required to obtain special permits or arrange for escorts before transporting oversized equipment. Rata Industries is not liable for personal or property damage caused by inappropriate, unauthorized or unsafe transport or operation of equipment.

Be certain all persons are clear of working area in and around the machine whenever raising or lowering the machinery or in any way using the tractors hydraulic system.

USING AND SETTING UP THE MACHINE

TROUBLE SHOOTING

Malfunction	Cause	Remedy
Roller rings loose	Normal wear and tear	One end of the roller ring assembly has a sliding collar to enable the roller rings to be tightened. Remove 20mm bolt from end of axle, remove spacer from behind end washer and re-tighten 20mm bolt to tighten rings. Ensure 20mm bolt is tightened against a solid face (may have to replace spacer width to suit) otherwise bolt will come loose and fall out during operation.
